Gyeongbokgung

Gyeongbokgung was the first royal palace built by the Joseon Dynasty, three years after the Joseon Dynasty was founded. Built in 1395, Gyeongbokgung was located at the heart of newly appointed capital of Seoul (then known as Hanyang) and represented the sovereignty of the Joseon Dynasty. The largest of the Five Grand Palaces (the others being Gyeonghuigung, Deoksugung, Changgyeonggung, Changdeokgung), Gyeongbokgung served as the main palace of the Joseon Dynasty.

Cheonggyecheon

Cheonggyecheon is an 11km long modern stream that runs through downtown Seoul. Created as part of an urban renewal project, Cheonggyecheon is a restoration of the stream that was once there before during the Joseon Dynasty (1392-1910). The stream was covered with an elevated highway after the Korean War (1950-1953), as part of the country's post-war economic development. Then in 2003, the elevated highway was removed to restore the stream to its present form today. The stream starts from Cheonggye Plaza, a popular cultural arts venue, and passes under a total of 22 bridges before flowing into the Hangang (River), with many attractions along its length.

Namdaemun Market

Namdaemun Market is the largest traditional market in Korea with over 10,000 stores that line the streets around Namdaemun (Gate), the main southern gate of the old city wall. It boasts one of the largest distribution structures in Korea, providing local products, daily living essentials, food products, medical supplies and more to retailers and consumers across the country. Due to the wholesale nature of the market, shoppers can comparison shop for the lowest prices on all sorts of goods. Namdaemun Market is also packed with interesting things to see and eat, making it a popular destination for both locals and international visitors alike. So whether you're looking for traditional oriental medicine or imported drugs, traditional Korean food or imported snacks, hanbok attire or a Halloween costume, Namdaemun Market is the place to go.

International Conference of
Manufacturing Technology Engineers

18(Thu)~19(Fri) October 2012
Millennium Seoul Hilton Hotel

Topics and Scope

- Advanced Machine Tools
- Ultraprecision Nano Machining
- Robot & Automation
- Tool & Die
- IT/BT Fusion
- Nano/Micro system
- Applied Optical Energy
- Design & CAE
- Packaging and Equipment
- Materials and Processing
- Net Shape Manufacturing (Metal Forming, Casting, Plastic Molding)
- Tribology
- Etc

Technology innovations is the key issue of our current concern, and dynamics of Korean industries and academics in manufacturing technology will be presented in this conference.

Full paper submission(optional) is required only for people who would like to publish the paper in the Journal of Manufacturing Technology and Engineering(in English).

Advisory Committee:

Prof. Berend Denkena (Germany)

Prof. Stefan Dimov (England)

Prof. Jun Ni (USA)

Prof. Takahashi Masaharu (Japan)

Prof. Haixia Zhang (China)

Prof. Minyang Yang (Korea)

***Organizing Committee Chair** Prof. Dong-Young Jang
